Russ Horn is impressive...

I first began to take a significant interest in the movement of financial asset prices when I discovered Investment Data Services (<https://www.gannanalytics.co.uk/about.html>) and learnt about the methods of the legendary trader, W D Gann (https://en.wikipedia.org/wiki/William_Delbert_Gann).

This was following the stockmarket 'correction' of October 1987.

In 1910, at the age of 32, Gann is reputed to have made 264 winning trades, both long and short, during a 25 day period. A more complete description is at traderslog.com (<http://www.traderslog.com/ganninterview/>).

Right now, traders from around the world are testing their skills in the Dukascopy Binary Option Contest (<https://www.dukascopy.com/fxcomm/binary/>)... each day, traders start with a \$1,000 balance in their demo accounts and the top traders with the greatest profit at the end of each month will win real cash prizes...

(<https://www.dukascopy.com/fxcomm/binary/>)

Trading Binary Options on the Dukascopy platform is easy... and you'll soon learn whether you have the necessary aptitude for trading without putting your capital at risk... for traditional market commentary, register for the Monday morning webinars by FXChoice (<https://www.youtube.com/c/FXChoice/videos>) and consider opening a demo account at Trader's Way... (<https://www.tradersway.com/trading-platforms/?ib=1052921>) learning to accept the inevitable losses is very theraputic...!!

I will suggest that any involvement with live trading of the Forex Market must be preceded by a sustained period (maybe 2-3 years) of practice with a demo account from a reputable broker...

Technical Analysis using Charts:

This chart was created on 24 May 1999 - © Copyright 1999 *FirstAlpha* (<https://www.firstalpha.info>)

In this chart of the FTSE 100 share index, 6180 proved to be significant resistance. If you have heard of Leonardo Fibonacci, you will not be surprised...!! Expect the 6180 level to give support. A break below could herald a 1000 point fall. (originally, I wrote this as a caption to the above chart published in 1999).

Today, a trader/investor has plenty of choice for conducting technical analysis on live Forex charts... one such website is Trading View (<http://www.traderlogic.com/tview.htm>), where a limited number of charts can be freely maintained...

I registered TRADERLOGIC.COM on 31 October 1998. This is the first domain name which I registered in my own name. I'm writing this on Friday, 21 August 2015 and I'm hoping the information which I am sharing here will be of benefit to those who read it... and lead to further discussions on Facebook (<fb-redirect.htm>)...
